# Innovation, Performance, and Security

## Patrol Block Shield

**A**utomotive Armor Manufacturing, Inc. (AAM) shields are engineered with rugged, lightweight and maneuverable qualities to provide longevity as well as the utmost protection. Our shields are manufactured with advance composite ballistic cores and encapsulated with a hybrid nano composite shell.

**Patrol Block Shield is designed to meet the following specifications:**

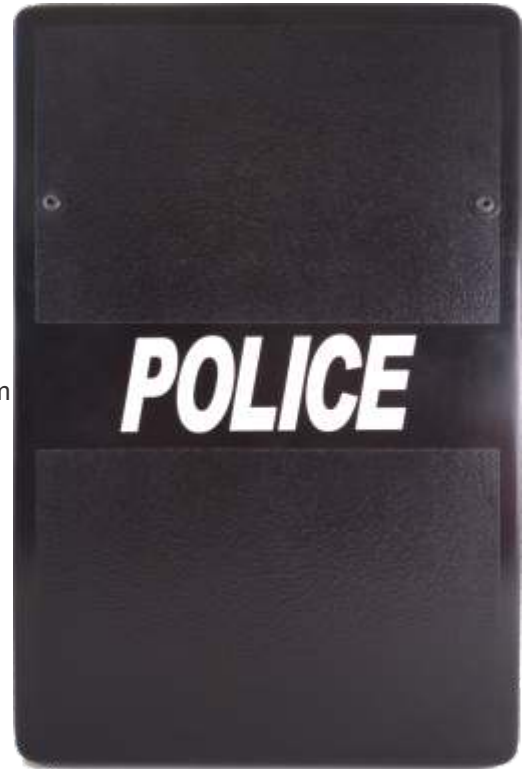

- Ballistic coverage area of 16" x 24"
- Heavy duty aluminum and composite handle system
- Lightweight
- Quick-release arm cuff system
- Defeats multiple round threats
- Exceeds National Institute of Justice (NIJ) standards

### Options:

- Color - Black, or OD Green
- Handle - Straight, or Triangular
- NIJ Ballistic Level - IIIA, or III
  - IIIA weight 7 pounds  
(Defeats .44mag 1400 fps, 9mm 1400fps, and lesser threats)
  - III weight 13 pounds  
(Defeats 7.62 x 51mm 2750 fps, and lesser threats)

**AAM shields are made from high quality composites, which properties include:**

- High strength and low density
- Excellent energy absorption
- 15 times the strength of steel (pound for pound)
- Resists chemicals, UV light and water

**Proudly made in the USA.**
