IMMEDIATE COVER FOR FIRST-ARRIVING OFFICERS

Compact protection designed for rapid deployment by first-arriving officers. The 16 × 28-inch, vehicle-stowable profile supports movement through corridors, doorways and confined spaces during active-threat response and officer-rescue operations.

HANDHELD CONTROL SYSTEM

A fixed triangular handle, high-density foam forearm pad and operator-releasable retention strap provide secure handheld control. The hook-and-loop strap anchor permits deliberate release if shield control is compromised.
