DOORWAY ACCESS | RESCUE & EVACUATION

MOBILE RIFLE PROTECTION THROUGH STANDARD DOORWAYS

A full-height mobile shield engineered for team movement under elevated rifle threats. Its 28-inch-wide profile passes through standard doorways, while the wheeled chassis supports controlled advancement, casualty rescue and evacuation without requiring an operator to carry the 173-pound protection system.

MOBILE CONTROL SYSTEM

A long push handle and stable three-wheel platform support deliberate team movement. One 10-inch front wheel provides steering; two 13-inch rear wheels support tracking and load stability through corridors, standard doorways and controlled approach routes.

CONFIGURATION

STANDARD

BLACK OR OD GREEN

LONG PUSH HANDLE

WHEELED PLATFORM

10-IN. FRONT | 13-IN. REAR WHEELS
